Good Morning,

As a policy, we don't provide a MSDS for our Vitamin K1 Gel Cap products.

Title 29 Code of Federal Regulations, Part 1910.1200, Hazard Communication, is OSHA Hazard Communication and the basic model for many state "Right-to-know" laws.

Paragraph (b) Scope and Application states that this standard applies to employers in SIC codes 20 through 39 who are to provide information to their employees.

It further states that this standard applies to chemicals.. It does not apply to "articles". Articles means "a manufactured item:\: (i) which is formed to a specific shape or design during manufacture; (ii) which has end use function dependent in whole or part upon its shape or design during use; and (iii) which does not release, or otherwise result in exposure to, a hazardous chemical under normal conditions of use.

Our Vitamin K1 Gel Caps are articles which under normal conditions of use do not result in exposure of employees in SIC codes 20 through 39, under normal conditions of use, during the course of their employment. We therefore have not prepared Material Safety Data Sheets for such products.

Sending Material Safety Data Sheets on the raw material components would be a misrepresentation of the true purpose of a MSDS since they would not provide any valid correlation to our finished products.

Sincerely,

Chad Dunn
Operations Manager
